If Michael Crichton and Clive Cussler were to combine their talents to create the ultimate summer read, MEG would be the result--a jaw-dropping and terrifying page-turner of the deep.

On a top-secret dive into the Pacific Ocean's deepest canyon, Jonas Taylor found himself face-to-face with the largest and most ferocious predator in the history of the animal kingdom. The sole survivor of the mission, Taylor is haunted by what he's sure he saw but still can't prove exists--*Carcharodon megalodon*, the massive mother of the great white shark. The average prehistoric Meg weighs in at twenty tons and could tear apart a Tyrannosaurus rex in seconds.

Written off as a crackpot suffering from post-traumatic stress disorder, Taylor refuses to forget the depths that nearly cost him his life. With a Ph.D. in paleontology under his belt, Taylor spends years theorizing, lecturing, and writing about the possibility that Meg still feeds at the deepest levels of the sea. But it takes an old friend in need to get him to return to the water, and a hotshot female submarine pilot to dare him back into a high-tech miniature sub.

Diving deeper than he ever has before, Taylor will face terror like he's never imagined, and what he finds could turn the tides bloody red until the end of time.

Steve Alten holds a master's degree in sports medicine and has a Ph.D. from Temple University. An avid amateur oceanographer, Alten has been studying Megalodons for over ten years. He lives with his wife and three children in South Florida. *MEG* is his first novel.
