Software and Systems Architecture in Action (Applied Software Engineering Series)

Raghvinder S. Sangwan

Software and Systems Architecture in Action (Applied Software Engineering Series) Raghvinder S. Sangwan

Modern-day projects require software and systems engineers to work together in realizing architectures of large and complex software-intensive systems. To date, the two have used their own tools and methods to deal with similar issues when it comes to the requirements, design, testing, maintenance, and evolution of these architectures.

Software and Systems Architecture in Action explores practices that can be helpful in the development of architectures of large-scale systems in which software is a major component. Examining the synergies that exist between the disciplines of software and systems engineering, it presents concepts, techniques, and methods for creating and documenting architectures.

The book describes an approach to architecture design that is driven from systemic quality attributes determined from both the business and technical goals of the system, rather than just its functional requirements. This architecture-centric design approach utilizes analytically derived patterns and tactics for quality attributes that inform the architect's design choices and help shape the architecture of a given system.

The book includes coverage of techniques used to assess the impact of architecture-centric design on the structural complexity of a system. After reading the book, you will understand how to create architectures of systems and assess their ability to meet the business goals of your organization.

Ideal for anyone involved with large and complex software-intensive systems, the book details powerful methods for engaging the software and systems engineers on your team. The book is also suitable for use in undergraduate and graduate-level courses on software and systems architecture as it exposes students to the concepts and techniques used to create and manage architectures of software-intensive systems.

From reader reviews:

Jeff Puckett:

Within other case, little individuals like to read book Software and Systems Architecture in Action (Applied Software Engineering Series). You can choose the best book if you'd prefer reading a book. Provided that we know about how is important any book Software and Systems Architecture in Action (Applied Software Engineering Series). You can add knowledge and of course you can around the world by just a book. Absolutely right, since from book you can learn everything! From your country till foreign or abroad you will be known. About simple matter until wonderful thing you could know that. In this era, we can easily open a book or perhaps searching by internet unit. It is called e-book. You need to use it when you feel weary to go to the library. Let's read.

Melissa Fanning:

Nowadays reading books be a little more than want or need but also get a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The data you get based on what kind of publication you read, if you want have more knowledge just go with education and learning books but if you want sense happy read one having theme for entertaining for instance comic or novel. The Software and Systems Architecture in Action (Applied Software Engineering Series) is kind of guide which is giving the reader erratic experience.

Alice Rodriguez:

Spent a free a chance to be fun activity to do! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the guide untitled Software and Systems Architecture in Action (Applied Software Engineering Series) can be excellent book to read. May be it is usually best activity to you.

Hazel Fletcher:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them family members or their friend. Do you know? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity this is look different you can read a new book. It is really fun for you personally. If you enjoy the book that you read you can spent 24 hours a day to reading a e-book. The book Software and Systems Architecture in Action (Applied Software Engineering Series) it is very good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. In case you did not have enough space to bring this book you can

buy the actual e-book. You can more simply to read this book through your smart phone. The price is not too costly but this book possesses high quality.
