Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A

Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A

Homeostasis and Toxicology of Essential Metals synthesizes the explosion of new information on the molecular, cellular, and organismal handling of metals in fish in the past 15 years. These elements are no longer viewed by fish physiologists as "heavy metals" that kill fish by suffocation, but rather as interesting moieties that enter and leave fish by specific pathways, which are subject to physiological regulation. The metals featured in this volume are those about which there has been most public and scientific concern, and therefore are those most widely studied by fish researchers. Metals such as Cu, Zn, Fe, Ni, Co, Se, Mo and Cr are either proven to be or are strongly suspected to be essential in trace amounts, yet are toxic in higher doses.

The companion volume, *Homeostasis and Toxicology of Non-Essential Metals*, Volume 31B, covers metals that have no known nutritive function in fish at present, but which are toxic at fairly low levels, such as Ag, Al, Cd, Pb, Hg, As, Sr, and U. In addition, three chapters in Volumes 31A and 31B on Basic Principles (Chapter 1, 31A), Field Studies and Ecological Integration (Chapter 9, 31A) and Modeling the Physiology and Toxicology of Metals (Chapter 9, 31B) act as integrative summaries and make these two volumes a vital set for readers.

- All major essential metals of interest are covered in metal-specific chapters
- Each metal-specific chapter is written by fish physiologists/toxicologists who are recognized authorities for that metal
- A common format is featured throughout this two volume edition

From reader reviews:

Ruth Brinkman:

Reading a book can be one of a lot of task that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new info. When you read a e-book you will get new information because book is one of several ways to share the information as well as their idea. Second, looking at a book will make anyone more imaginative. When you reading through a book especially fictional works book the author will bring you to imagine the story how the character types do it anything. Third, you may share your knowledge to others. When you read this Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A, it is possible to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire different ones, make them reading a book.

Daniel Weimer:

Many people spending their moment by playing outside with friends, fun activity using family or just watching TV all day long. You can have new activity to invest your whole day by examining a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It okay you can have the e-book, getting everywhere you want in your Touch screen phone. Like Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A which is finding the e-book version. So , try out this book? Let's find.

Martha Williams:

Is it an individual who having spare time subsequently spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A can be the solution, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these guides have than the others?

Betty Bobbitt:

As we know that book is important thing to add our understanding for everything. By a publication we can know everything we really wish for. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Fish Physiology: Homeostasis and Toxicology of Essential Metals, Volume 31A was filled about science. Spend your free time to add your knowledge about your science competence. Some people has several feel when they reading the book. If you know how big benefit of a book, you can experience enjoy to read a reserve. In the modern era like now, many ways to get book you wanted.
