The world's first peace organizations emerged in the 19th century and since that time, anti-war activism has progressed rapidly. This illuminating book presents a realistic analysis of the extent to which the war system has infiltrated all aspects of Western culture and how it works to perpetuate war rather than promote peace. Additionally, the text describes the historically recent and still evolving parallel system of peace institutions. The values and ideas that have grown out of peace activism offer a very real opportunity to outlaw war in the coming century just as slavery was abolished in the 19th century.
