THE ORIGIN OF SPECIES & THE VOYAGE OF THE BEAGLE

INTRODUCED BY DARWIN'S GREAT GREAT GRANDDAUGHTER RUTH PADEL

When the eminent naturalist Charles Darwin returned from South America on board the H.M.S Beagle in 1836, he brought with him the notes and evidence which would form the basis of his landmark theory of evolution of species by a process of natural selection. This theory, published as *The Origin of Species* in 1859, is the basis of modern biology and the concept of biodiversity. It also sparked a fierce scientific, religious and philosophical debate which still continues today.

THE COMMUNIST MANIFESTO

INTRODUCED BY DAVID AARONOVITCH

The Communist Manifesto was first published in London, by two young men in their late twenties, in 1848. Its impact reverberated across the globe and throughout the next century, and it has come to be recognised as one of the most important political texts ever written. Maintaining that the history of all societies is a history of class struggle, the manifesto proclaims that communism is the only route to equality, and is a call to action aimed at the proletariat. It is an essential read for anyone seeking to understand our modern political landscape.
