## **Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)** Mikhail Kozlov, Elena Zvereva, Vitali Zverev

The adverse consequences of pollution impact on terrestrial ecosystems have been under careful investigation since the beginning of the twentieth century. Several thousand case studies have documented the biotic effects occurring in contaminated areas. However, after more than a century of research, ecologists are still far from understanding the effects of pollution on biota. Only a few generalisations have been made on the basis of extensive monitoring programs and numerous experiments with industrial contaminants. The need to reveal general patterns in the responses of terrestrial biota to industrial pollution and to identify the sources of variation in these responses became obvious more than a decade ago. At about that time, our team initiated a quantitative research synthesis of the biotic effects caused by industrial pollution, based on 1 a meta-analysis of published data. All meta-analyses conducted so far (covering diversity and abundance of soil microfungi, diversity of vascular plants, diversity and abundance of terrestrial arthropods, and plant growth and reproduction) consistently showed high heterogeneity in the responses of terrestrial biota to industrial pollution. At the same time, they demonstrated an unexpected shortage of information suitable for meta-analyses, as well as a considerable influence of methodology of primary studies on the outcome of the research syntheses. To overcome the identified problems, we designed a comparative study, the results of which are reported in this book.

**From reader reviews:**

**Doris Geer:**

The book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)* can give more knowledge and information about everything you want. Why then must we leave the best thing like a book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)*? Several of you have a different opinion about e-book. But one aim that will book can give many information for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or facts that you take for that, you are able to give for each other; it is possible to share all of these. Book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)* has simple shape however you know: it has great and large function for you. You can seem the enormous world by wide open and read a book. So it is very wonderful.

**Eric Hough:**

Book is to be different for every grade. Book for children until eventually adult are different content. As you may know that book is very important for us. The book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)* had been making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)* is not only giving you considerably more new information but also to get your friend when you really feel bored. You can spend your spend time to read your guide. Try to make relationship with the book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)*. You never feel lose out for everything when you read some books.

**Lisa Jennings:**

A lot of book has printed but it takes a different approach. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever through searching from it. It is known as of book *Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution)*. You can contribute your knowledge by it. Without departing the printed book, it could possibly add your knowledge and make a person happier to read. It is most important that, you must aware about book. It can bring you from one location to other place.

**Ryan Barrett:**

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from your book. Book is published or printed or descriptive from each source this filled update of news. On

this modern era like right now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just trying to find the Impacts of Point Polluters on Terrestrial Biota: Comparative analysis of 18 contaminated areas (Environmental Pollution) when you necessary it?
