Quantum Entanglement and Information Processing, Volume 79: Lecture Notes of the Les Houches Summer School 2003

It has been recognised recently that the strange features of the quantum world could be used for new information transmission or processing functions such as quantum cryptography or, more ambitiously, quantum computing. These fascinating perspectives renewed the interest in fundamental quantum properties and lead to important theoretical advances, such as quantum algorithms and quantum error correction codes. On the experimental side, remarkable advances have been achieved in quantum optics, solid state physics or nuclear magnetic resonance. This book presents the lecture notes of the Les Houches Summer School on 'Quantum entanglement and information processing'. Following the long tradition of the les Houches schools, it provides a comprehensive and pedagogical approach of the whole field, written by renowned specialists.

One major goal of this book is to establish connections between the communities of quantum optics and of quantum electronic devices working in the area of quantum computing. When two communities share the same goals, the universality of physics unavoidably leads to similar developments. However, the communication barrier is often high, and few physicists are able to overcome it. This school has contributed to bridge the existing gap between communities, for the benefit of the future actors in the field of quantum computing.

The book thus combines introductory chapters, providing the reader with a sufficiently wide theoretical framework in quantum information, quantum optics and quantum circuits physics, with more specialized presentations of recent theoretical and experimental advances in the field. This structure makes the book accessible to any graduate student having a good knowledge of basic quantum mechanics, and extremely useful to researchers.

- Covers quantum optics, solid state physics and NMR implementations
- Pedagogical approach combining introductory lectures and advanced chapters
- Written by leading experts in the field
- Accessible to all graduate students with a basic knowledge of quantum mechanics

From reader reviews:

David Hogan:

What do you regarding book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your extra time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everybody has many questions above. They should answer that question due to the fact just their can do that will. It said that about book. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need this particular Quantum Entanglement and Information Processing, Volume 79: Lecture Notes of the Les Houches Summer School 2003 to read.

Conrad Degregorio:

Are you kind of busy person, only have 10 as well as 15 minute in your moment to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your short space of time to read it because this time you only find guide that need more time to be study. Quantum Entanglement and Information Processing, Volume 79: Lecture Notes of the Les Houches Summer School 2003 can be your answer given it can be read by anyone who have those short time problems.

Denise Niemi:

What is your hobby? Have you heard which question when you got students? We believe that that issue was given by teacher to the students. Many kinds of hobby, All people has different hobby. Therefore you know that little person like reading or as reading become their hobby. You must know that reading is very important and also book as to be the issue. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You see good news or update with regards to something by book. Different categories of books that can you choose to use be your object. One of them is this Quantum Entanglement and Information Processing, Volume 79: Lecture Notes of the Les Houches Summer School 2003.

William Matthews:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information from your book. Book is prepared or printed or outlined from each source in which filled update of news. In this particular modern era like now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just searching for the Quantum Entanglement and Information Processing, Volume 79: Lecture Notes of the Les Houches Summer School 2003 when you required it?
