## **30 Ways to Have Some Computer-Controlled Evil Fun!**

"The steps are easy to follow...text is precise and understandable...uses very clear pictures and schematics to show what needs doing...Most importantly these projects are fun!"--Boing Boing

This wickedly inventive guide shows you how to program and build a variety of projects with the Arduino microcontroller development system. Covering Windows, Mac, and Linux platforms, *30 Arduino Projects for the Evil Genius* gets you up to speed with the simplified C programming you need to know--no prior programming experience necessary.

Using easy-to-find components and equipment, this do-it-yourself book explains how to attach an Arduino board to your computer, program it, and connect electronics to it to create fiendishly fun projects. The only limit is your imagination!

### ***30 Arduino Projects for the Evil Genius:***

- Features step-by-step instructions and helpful illustrations
- Provides full schematic and construction details for every project
- Covers the scientific principles behind the projects
- Removes the frustration factor--all required parts are listed along with sources

### ***Build these and other devious devices:***

- Morse code translator
- High-powered strobe light
- Seasonal affective disorder light
- LED dice
- Keypad security code
- Pulse rate monitor
- USB temperature logger
- Oscilloscope
- Light harp
- LCD thermostat
- Computer-controlled fan
- Hypnotizer
- Servo-controlled laser
- Lie detector
- Magnetic door lock
- Infrared remote

Each fun, inexpensive Evil Genius project includes a detailed list of materials, sources for parts, schematics, and lots of clear, well-illustrated instructions for easy assembly. The larger workbook-style layout and convenient two-column format make following the step-by-step instructions a breeze.

In December 2011, Arduino 1.0 was released. This changed a few things that have caused the sketches for Projects 10, 27, and 28 in this book to break. To fix this, you will need to get the latest versions of the Keypad and IRRemote libraries.

- The Keypad library has been updated for Arduino 1.0 by its original creators and can be downloaded from here: <http://www.arduino.cc/playground/Code/Keypad>
- Ken Shirriff's IRRemote library has been updated and can be downloaded from here: <http://www.arduinoevilgenius.com/new-downloads>

### **Make Great Stuff!**

TAB, an imprint of McGraw-Hill Professional, is a leading publisher of DIY technology books for makers, hackers, and electronics hobbyists.

### **From reader reviews:**

#### **Melody Grissom:**

The book 30 Arduino Projects for the Evil Genius will bring you to definitely the new experience of reading any book. The author style to describe the idea is very unique. In the event you try to find new book to read, this book very appropriate to you. The book 30 Arduino Projects for the Evil Genius is much recommended to you to see. You can also get the e-book from official web site, so you can more readily to read the book.

#### **Clarine Davidson:**

A lot of people always spent all their free time to vacation or perhaps go to the outside with them family or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity this is look different you can read a new book. It is really fun for you. If you enjoy the book that you read you can spent 24 hours a day to reading a publication. The book 30 Arduino Projects for the Evil Genius it is quite good to read. There are a lot of folks that recommended this book. They were enjoying reading this book. If you did not have enough space to create this book you can buy often the e-book. You can m0ore easily to read this book through your smart phone. The price is not to fund but this book features high quality.

#### **Lisa Yates:**

Do you have something that that suits you such as book? The reserve lovers usually prefer to pick book like comic, brief story and the biggest you are novel. Now, why not hoping 30 Arduino Projects for the Evil Genius that give your satisfaction preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the opportunity for people to know world much better then how they react in the direction of the world. It can't be stated constantly that reading behavior only for the geeky man but for all of you who wants to always be success person. So , for all of you who want to start studying as your good habit, you can pick 30 Arduino Projects for the Evil Genius become your starter.

#### **Tammy Booker:**

Many people spending their time period by playing outside with friends, fun activity with family or just watching TV the entire day. You can have new activity to spend your whole day by looking at a book. Ugh, think reading a book will surely hard because you have to use the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Mobile phone. Like 30 Arduino Projects for the Evil Genius which is getting the e-book version. So , try out this book? Let's find.
